### DETAILED ACTION

1. Applicant's amendment filed 8/21/03 in Paper No. 20 is acknowledged and entered.

Claims 33-50 are canceled by the amendment. Claims 1, and 51-52 are amended by the amendment. Claims 53-86 are added by the amendment.

2. Claims 1-32, and 51-86 are pending.

### *Election/Restrictions*

3. The presently amended claimed invention (Claims 1-32, and 51-86) disclosed a plurality of patentably distinct species.

Applicant is required under 35 U.S.C. 121 to elect a *single* disclosed species from *each* of the following group of species for purposes of search, even though this requirement is traversed.

The groups of species are as follows:

- a) A *single specific* species of condition of the array (e.g. air-water interface or ambient humidity).
- b) A *single specific* species of protein.
- c) A *single specific* species of substrate.
- d) A *single specific* species of substrate coating.

The species are distinct, each from the other, because each species have different chemical structure and/or physiochemical properties and would be capable of separate

Art Unit: 1639

manufacture and/or use; and would necessitate different and separately burdensome manual and computer bibliographic and structure searches in both patent and non-patent areas.

*For this response to be complete and for search purposes, applicants should provide the chemical structure of elected species of substrate and substrate coating, wherein each specific formula substituents of each of the above identified elected species are defined either by picture, or by expressing the species in terms of the variables of the formula.*

4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and *a listing of all claims readable thereon*, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

5. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

6. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 1639

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to My-Chau T. Tran whose telephone number is 703-305-6999.
